EXPERIENCE

2014 - Present   **GENERAL ASSEMBLY**   New York, NY
Developer (Nov. '14 - Feb. '14), Software Development Bootcamp
- Creating a JS/ React.js app to help elderly women with chronic illnesses maintain wellness plans
  - Using Websockets to create a chat portal for small groups to stay accountable between meetings
- Independently built and deployed 3 Ruby/ Rails apps, including a "Product Hunt for Digital Health" and a social network for users to share wellness data (uses wearables APIs, d3.js, and PostgreSQL)
- Developed a single-page contact management app using Backbone.js and Sinatra
- Multiple group projects using TDD, pair programming, Git, and RESTful API design in Javascript and Ruby

2012 - 2014   **DELOITTE CONSULTING LLP**   New York, NY
Consultant (Aug. '14 - Nov. '14), Deloitte Consulting Innovation
Deloitte Consulting Innovation is an internal product lab generating new business growth for Deloitte
- Created "Project AI", a care management tool for elderly patients with chronic illnesses that uses remote patient data and cognitive analytics; ran "Project AI" on top of full-time role on my other product "Bridge"
  - Built technical and user-facing specs for prototype; secured internal funding
  - Collaborated cross-functionally with healthcare, marketing, and legal groups to vet and sign agreements with two external partners
- For the "Bridge" product, promoted to business development lead along with technical duties
  - Helped close 2 initial Fortune 100 clients; managed healthcare startup research team

Business Analyst (June '13 - July '14), Deloitte Consulting Innovation
- Product team for "Bridge", an app to connect Fortune 500 firms with startups/ innovators
  - Designed year-long product roadmap and beta program, including >200 user stories and test plans using Jira/ Jama; leveraged feedback from upper management at Deloitte to inform design
  - Implemented Agile Scrum methodology and led daily scrum meetings with 9 remote developers, designers, and QA team members
  - Built hi-res UI mockups for all functionality using Sketch and Photoshop; advised front-end developers on UX requirements
  - Ran demos and pitches to Fortune 100 executives across 5 industry verticals
- Developed first internal hackathon; helped implement crowdsourcing tool for Deloitte's 200k employees which in one year generated new business ideas with forecasted revenues of >$100M

Business Analyst (Sep. '12 - May '14), Federal Digital Strategy   Washington, DC
- Designed technical specs for Department of Defense financial management system
- Advised >$350M USAID / MCA- Malawi energy infrastructure project

2011   **UNITED STATES OLYMPIC COMMITTEE**   Colorado Springs, CO
Business Analyst Intern (May '11 - Aug. '11)
- Learned and implemented rapid prototyping tool used for all US 2012 London Games IT projects
